2023 Specifications

HP	175
Length	25"
Weight	531 Lbs
Engine	inline 4
Displacement	174.9 cu.in.
Fuel System	EFI
Color	Black or White

CHOOSING A SUZUKI OUTBOARD TO MATCH YOUR NEW DUSKY

Suzuki offers a full line of outboard motors, one of which is the ideal match for your new Dusky center console or bay boat. But why should you choose Suzuki? Here are three good reasons: Innovation, Reliability and Performance.

INNOVATION

Over the past 20 years, Suzuki has consistently led the industry in 4-stroke technology and innovation. Suzuki introduced the first fuel injected 4-stroke outboards in 1996 and have introduced new products every year since then, including the first v6 4-strokes to break the 250 and 300 horsepower barriers, the first high performance 4-stroke outboards, and even the first 4-stroke outboards to feature batteryless electronic fuel injection.

Suzuki's multi-point sequential EFI does more than just inject gas into a cylinder. It's a high-tech system that monitors multiple engine operating parameters to provide just the right amount of fuel to maximize efficiency without compromising performance. New-generation Suzuki outboards also feature Lean Burn Control Technology to further improve fuel economy over a wide rpm range.

Overall, Suzuki has received eight NMMA Innovation Awards, more than any other outboard manufacturer; proof positive that Suzuki has been, and continues to be on the leading edge of technology.

RELIABILITY

When you take delivery of your new Dusky boat powered with a Suzuki outboard, you'll be getting one of the world's most reliable products. Year after year, season after season, we hear from satisfied Suzuki owners that are enjoying worry-free boating every time they head out on the water. Suzuki outboards, like Dusky boats, are engineered and built to last, with the highest quality parts and components, and care and precision in manufacturing.

Suzuki backs up its promise of reliability with a standard 3-Year Limited Warranty, and they offer an additional 3-Year Extended Protection Plan for added peace of mind.

PERFORMANCE

Innovation and reliability are excellent qualities in an outboard motor, but the real proof comes when you're ready to put the throttle down and take off across the water. With a Suzuki outboard, you won't be disappointed.

Whether you're running a V6 or a new fuel-injected portable model, you'll always find the displacement to provide plenty of torque and a lower unit that's geared to move you and your boat. Prove it for yourself, just ask for test drive. When you're choosing your new Dusky be sure to choose a new Suzuki 4-stroke outboard to go with it.
